

Quantity Surveyor

This role offers the opportunity to become an integral part of a team of engineers and managers delivering civil and geotechnical projects across the Bailiwick. Reporting to the Commercial Director and working within a friendly team, training and support will be provided to ensure development and progression with an opportunity for significant growth for the right candidate. Essential skills required:

- Self-motivation and attention to detail
- Comfortable with both an office and site based working environment
- A logical and methodical approach
- Strong organisational skills with the ability to balance several work streams
- A real team player with well-developed interpersonal and negotiation skills
- Proficient communication skills, both verbal and written
- IT competence with the ability to use Microsoft Excel, Word, Teams & Project
- A desire to learn new skills and knowledge relevant to the role

Role Objectives:

- To assist the Commercial Director in supporting company site operations
- To undertake day to day commercial and administrative duties on a project by project and company-wide basis
- To assist in the production of accurate and reliable financial information and reports

The role can be adapted to suit you as an individual. On the job training, participation in formal further education and professional development will be supported and encouraged. This is an excellent opportunity to develop a career in a flexible and fast-paced environment.

Please apply by sending a CV and brief description of your experience to recruitment@geomarine.gg. Alternatively, please call if you would like an informal chat or meeting to find out more about Geomarine and to see if the role might be right for you. All applications are treated in the strictest confidence. Geomarine is an equal opportunities employer and all applications are welcome.
